

Case Study – Plant Nursery

Project	Springfields Fresh Produce Springfield, Manorbier, Tenby, Pembrokeshire.
Equipment	2 x Gasokol TecSol flat plate solar collectors (4m ²) connected to a 117 litre twin coil vented copper cylinder, plumbed.
Details	Located in the Pembrokeshire Coast National Park, Springfields Fresh Produce is a family run small holding specialising in growing daffodils, soft fruits and home grown produce.
Objective	Having decided to have solar water heating installed in their home, a similar installation was carried out in an adjacent building to provide the hot water needs for staff in the working and packing areas of the family run business.
Achievements	A sustainable energy option was required for the efficient heating of water for both home and business needs. Solar water heating was chosen as the most viable option. The customer has reported that the solar system has proved to be making real savings on energy bills.

Old School Yard, Smithfield Street, Llanidloes, Powys, SY18 6EJ.
